Location - Delta-2, G- Block, House no.- 72, Greater Noida

Career Objective

- Computer Science Engineering student specializing in Artificial Intelligence with knowledge of Python, Machine Learning, Data Science, Data Analysis, and AI-powered applications. Skilled in FastAPI, Pandas, NumPy, TensorFlow, SQL, APIs, Docker, and RAG-based systems. Seeking an opportunity in Artificial Intelligence, Machine Learning, Data Science, or Data Analytics.

Technical Skills

- Programming: Python, C
- AI/ML: Machine Learning, Neural Networks, Deep Learning, Pandas, NumPy, TensorFlow, RAG
- Data Science/Data Analytics: Data Analysis, Data Processing
- Backend & APIs: FastAPI, REST APIs
- Database: SQL
- Tools: Docker, Git/GitHub
- Soft Skills: Leadership, Communication, Collaboration, Problem Solving

Education

- B.Tech CSE (AI) | IIMT College of Engineering, AKTU | 2023 - 2027 | CGPA: 7.1
- XII (UP Board) | Almighty Public Intermediate College | 2022 | 74.12%
- X (UP Board) | Almighty Public Intermediate College | 2020 | 73%

Projects

- **Job Search AI Agent | AI / RAG Application**
 - Developed an AI-powered job search application for resume analysis and relevant job exploration using Python and FastAPI. Worked with RAG-based pipelines and features such as skill identification, ATS-oriented evaluation, job matching, and interview preparation.
- **Movie Recommendation System**
 - Developed a machine learning application that suggests movies based on user preferences, behavior, and past interactions to provide personalized recommendations.
- **E-Commerce Platform**
 - Developed features such as product listing and user interaction, gaining practical development experience and improving problem-solving skills.

Achievements

- 12th Position in Hackathon at IIMT College of Engineering among 30 teams.

Certifications

- Center of Excellence: IoT Devices and AI Course
- Deep Learning
- Data Science in Python
- Python Bootcamp
